

Liste des médicaments contre-indiqués

Les anti-arythmiques

Classe 1:

- Ajmaline
- Cibenzoline
- Dihydroquinidine
- Disopyramide
- Encainide
- Flecainide
- Mexiletine
- Pirmenol
- Procainamide
- Propafenone
- Quinidine

Classe 3:

- Almokalant
- Amiodarone
- Azimilide
- Bretylium
- Dofetilide
- Dronedarone
- d-sotalol
- ersentilide
- ibutilide
- nifekalant
- sematilide
- sotalol
- terikalant

Les anti-angoreux/vasodilateurs

- bepridil
- lidoflazine
- prenylamine
- ranolazine
- terodiline
- vardenafil

Les anti-hypertenseurs

- indapamide
- isradipine
- moexipril/hydrochlorthiazide
- nicardipine

Les antihistaminiques

- astemizole
- azelastine
- diphenhydramine
- ebastine
- hydroxyzine
- terfenadine

Les agonistes et abtagonistes de la Serotonine

- cisapride
- dolasetron
- granisetron
- ketanserine
- ondansetron

Les antibiotiques

Macrolide:

- Azithromycine
- Clarithromycine
- Erythromycine
- Roxithromycine
- spiramycine
- telithromycine

Quinolones :

- Ciprofloxacin
- Gatifloxacin
- Gemifloxacin
- Grepafloxacin
- levofloxacin
- moxifloxacin
- Ofloxacin
- sparfloxacin

Antifongiques:

- Cotrimoxazole
- fluconazole (itraconazole)
- ketoconazole
- voriconazole

Autres:

- Pentamidine
- trimethoprim sulfa (bactrim)

Antiviral:

- foscarnet (HIV)

Antipaludique

- amantidine
- Chloroquine
- Halofantrine
- quinine

Les anti-dépresseurs

Tricycliques:

- amitriptyline
- amoxapine
- clomipramine
- desipramine
- doxepin
- imipramine
- nortriptyline
- protriptyline
- trimipramine

Phenothiazines:

- chlorpromazine
- fluphenazine
- prochlorperazine
- thioridazine
- trifluoperazine

Autres:

- atomoxetine
- citalopram
- clozapine
- droperidol
- fluoxetine
- haloperidol

- levomethadyl
- lithium
- maprotiline
- mesoridazine
- methadone
- paroxetine
- pericycline
- pimozone
- quetiapine
- risperidone
- sertindole
- sertraline
- trazodone
- venlafaxine
- zimeldine
- ziprasidone

Les anti-convulsifs

- Felbamate
- fosphenytoin

Les Anti-migraineux

- naratriptan
- Sumatriptan
- zolmitriptan

Les Anti-cancereux

- arsenic trioxide
- geldanamycin
- sunitib
- tacrolimus
- tamoxifen

Autres

- alfuzosine
- chloral hydrate
- clobutinol
- domperidone
- galantamine
- octreotide
- organophosphates
- perflutren lipid microspheres
- probucol
- solifenacine
- tizanidine
- tolterodine
- vasopressine

Les Stimulants

- adrenaline (epinephrine)
- amphetamine
- cocaine
- dexmethylphenidate
- dobutamine
- dopamine
- ephedrine
- fenfluramine
- isoprenaline (isoproterenol)
- levalbuterol
- metaproterenol
- methylphenidate
- midodrine
- norepinephrine (noradrenaline)
- phentermine
- phenylephrine
- phenylpropanolamine
- pseudoephedrine
- ritodrine
- salbutamol (albuterol)
- salmeterol
- sibutramine
- terbutaline
